

## 83 Fibered Dampproofing (brush or spray)

**DESCRIPTION:**

KARNAK 83 Fibered Dampproofing is a solvent based asphalt compound, manufactured with selected asphalts, mineral fibers, stabilizers and mineral spirits. 83 Fibered Dampproofing is prepared to semi-mastic consistency for easy application, by brush, spray or roller. This material is a multi-purpose, cold applied protective dampproofing that dries to a tough, durable and flexible coating that gives excellent performance over a wide range of temperature and conditions. This product exhibits excellent resistance to acids and alkalis in the soils and in the environment.

**USES:**

83 Fibered Dampproofing is designed to dampproof masonry and concrete exterior surfaces below grade and interior surfaces above grade. This product is also suitable as a general protective coating for wood, steel and for all backup materials for masonry such as stone, brick and concrete.

**SURFACE PREPARATION:**

Surfaces must be clean, dry and free from oil, grease, release agents, laitance, dirt, dust and debris. All cracks and pin holes should be repaired and filled with KARNAK 86 Trowel Mastic prior to coating. If the surface is very porous, it is recommended that KARNAK 108 Asphalt Primer be utilized to provide a firm film base prior to coating with KARNAK 83 Fibered Dampproofing.

**BRUSH APPLICATION:**

Apply with a wide, fiber brush at the rate of 4 gallons per 100 sq. ft.

**SPRAY APPLICATION:**

Utilize a standard heavy duty airless spray pump using heavy duty guns and nozzles. Equipment manufacturers should be consulted for more complete information. Apply at the rate of 4 gallons per 100 sq. ft.

**COVERAGE RATE:**

Apply at the rate of 4 gallons per 100 square feet.

**SPECIFICATIONS:**

ASTM D-4479 Type I  
SSA-694d

**PHYSICAL PROPERTIES:**

Weight per Gallon:	8.4 lbs.
Solids by Weight:	72%

Rev. 09.10.18

## 83 Fibered Dampproofing (brush or spray)

Solids by Volume:	65%
Color:	Black
Permeability:	.25 perms
Cure Time:	24 to 48 hours @ 77°F @ 50% Relative Humidity
Application:	Brush or Spray
Service Temperature Range:	15°F to 150°F

### CHEMICAL RESISTANCE:

Acids	Excellent
Alkaline	Excellent
Salts	Excellent

**NOTE:** Allow the film to cure for at least 24 to 48 hours prior to backfilling. Care should be taken during filling not to puncture or damage the coating. A protection board is highly recommended to protect the film prior to backfilling. Backfilling should take place within 7 days in areas where hydrostatic pressure is known to occur. Contact Karnak for alternate product suggestions.

### CAUTION:

Do not use near open flame. Material is for building exterior applications only. Avoid breathing solvent fumes and prolonged contact with skin. Do not take internally. If swallowed, **do not induce vomiting**. Call a physician immediately. Keep out of reach of children. Keep container covered when not in use. **Do not thin**. Dispose of in an environmentally safe manner. Cover air intakes during application and while drying.

### PACKAGING:

Available in 5 gallon pails and 55 gallon drums.

**If further information is needed, contact KARNAK Technical Services at 1-800-526-4236.**
